SUMMARY

Dedicated full-stack developer with 10 plus years of experience in building scalable, serverless applications, proficient in a broad range of technologies. Possesses strong expertise in AWS services, consistently delivering efficient, highperforming solutions. Thrives in fast-paced environments, ensuring the delivery of high-quality software while adapting seamlessly to evolving business demands

SKILLS

Frontend Technologies: AngularJS, Angular 18, ExtJS, OpenLayers, Google APIs, HTML5, jQuery, Bootstrap, CSS

Backend Technologies: Node.js, Express.js, Hapi.js, CorePHP, Drupal, Python, Pyspark, Boto3, Oauth, JWT

Cloud Services: AWS Services, AWS Glue, Step Functions, SQS (Simple Queue Service), SES, Lambda, API Gateway, Textract, AWS Kinesis, Azure Blob Storage

Databases: PostgreSQL, MSSQL, SQL Server, MongoDB, DynamoDB, Redis

CI/CD: SVN, GitLab, Bitbucket, CircleCI, JFrog, Jenkins, IAC tools

Integration & Messaging: Third-Party API Integration, SQS, Kafka

Testing Frameworks: Jest, AVA, Jasmine

EXPERIENCE

Senior Engineer

Hexaware(Mobiquity) **March 2021 - Present, TS**

- Designed and implemented a serverless architecture using API Gateway, AWS Lambda, and DynamoDB to ensure scalability and efficiency.
- Developed an MVP from scratch, overseeing the complete development lifecycle from planning to deployment.
- Engineered ETL processes and AWS Glue for efficient end-of-day reconciliation and data transformation.
- Ensured robust application security and facilitated seamless integration with multiple third-party APIs and databases.
- Authored unit tests using Jest and AVA, achieving a code coverage of 80% or higher, ensuring reliability and maintainability.
- Delivered rapid bug fixes, demonstrating a quick turnaround time and maintaining project momentum.
- Mentored junior developers, fostering skill development, and guiding the team toward successful project outcomes.

Associate Projects

Cognizant **May 2018 - March 2021, TS**

- Led the development of new features, ensuring functionality and quality through comprehensive unit testing.
- Created reusable components to optimize development efficiency and maintainability across projects.
- Actively participated in sprint planning, task estimation, and backlog refinement as part of an agile development process.
- Conducted thorough code reviews, providing constructive feedback on pull requests to ensure code quality and best practices.
- Experienced with continuous integration and delivery (CI/CD), streamlining the deployment process for faster, more reliable releases
- Collaborated with cross-functional teams to prioritize and deliver project milestones on time.

Software Engineer

JMR Info tech. **July 2017 - April 2018, TN**

- Developed and implemented video streaming functionality, customizing video players for compatibility and smooth user experience
- Optimized application performance and scalability to handle increased user load and data processing efficiently
- Collaborated with cross-functional teams to deliver features on time and to specification
- Designed and implemented UI screens based on UX wireframes to ensure user-friendly and responsive interfaces
- Integrated third-party APIs to enhance the application with external services and data sources
- Implemented RESTful API services for efficient communication between frontend and backend systems.

Software Engineer

People Prime Worldwide Pvt Ltd (Napier Health Care) **November 2016 - July 2017, TS**

- Collaborated with cross-functional teams to ensure feature alignment with business requirements
- Conducted rigorous testing and code reviews to ensure high code quality
- Assisted in post-deployment support, addressing any issues and implementing further refinements as needed
- Enhanced functionality and performance within the existing application framework
- Ensured smooth interaction between various system components by implementing key functionalities and service integrations
- Maintained high software reliability by proactively identifying and fixing bugs.

Software Engineer

Asman Software Solutions **January 2015 - November 2016, TS**

- Designed and developed rich, responsive web pages using HTML, CSS, and Bootstrap to ensure cross-browser compatibility and optimal user experience on all devices
- Implemented dynamic data visualization through interactive charts and tables, utilizing data from APIs to provide real-time insights and enhance decision-making for users
- Developed secure and efficient web services using PHP for seamless data exchange between client and server
- Integrated real-time data display on Google Maps and OpenStreetMap (OSM) to create visually engaging and informative location-based services
- Optimized front-end performance by adhering to best practices in web development to reduce load times and enhance user engagement
- Ensured high accessibility standards by implementing web pages that catered to users with different needs and devices.

AWARDS & HONORS

Ace Award

Hexaware(Mobiquity)

- Honored with the Ace Award at Hexaware(Mobiquity) for outstanding performance and contributions that significantly impacted the success of critical projects.

Certificate of Appreciation

Cognizant

- Received a Certificate of Appreciation for delivering exceptional performance and consistently surpassing expectations.

Above and Beyond Award

Cognizant

- Awarded the Above and Beyond Award at Cognizant, recognizing unparalleled dedication and commitment to exceeding project goals and delivering exceptional results.
